PERSONAL STATEMENT

I've started to develop more skills in Javascript, React, Nodejs, and frontend HTML, CSS, SASS, and frameworks like Bootstrap, React-Bootstrap, as I see big potential into these technologies and because I love web programming, I'm reliable, punctual person and would love so much working in a programming environment in your company, I would definitely do my best to be the person you expect. I've recently started working for a tech company as a Java / Angular developer and working with Git / Docker. Please check my personal portfolio at: <http://lucutovidiu.herokuapp.com>
